

Acorn SWEET TOOTH *Extend*
Specialist Grazing Mix (41% Tetraploid)

2.5 kg AberGain
3.5 kg AberChoice
2.0 kg Dunluce
3.0 kg Drumbo
0.5 kg Coated White Clover
11.5 kgs

KEY FEATURES:

- Exceptional digestibility
- Excellent spring and autumn growth
- Gives a leafy palatable sward and high utilisation.

Contains varieties:

AberGain (T) - highest late tetraploid on Teagasc PPI. Excellent spring, autumn and total yield. Highest digestibility variety on Irish Recommended List.

AberChoice – highest late diploid on Teagasc PPI. Unbeatable total yield and autumn growth. Highest digestibility diploid on Irish RL.

Dunluce (T) – excellent seasonal and total yield with exceptional quality. Superb silage yields. A dual purpose variety suited to both intensive grazing and silage cutting.

Drumbo – exceptional spring and autumn growth and very high quality.

Acorn GOLD TOOTH
Dual-Purpose Mix (36% Tetraploid)

2.0 kg Kintyre
2.0 kg Dunluce
4.5 kg Drumbo
2.5 kg Clanrye
0.5 kg Coated White Clover
11.5 kgs

KEY FEATURES:

- Formulated to deliver highly digestible high yielding silage crops
- Exceptional digestibility and palatability
- Excellent sward density and persistency.

Contains varieties:

Kintyre (T) - very high yielding variety, with excellent silage yields and autumn growth. Very palatable variety.

Dunluce (T) – excellent seasonal and total yield with exceptional quality. Superb silage yields. A dual purpose variety suited to both intensive grazing and silage cutting.

Drumbo - exceptional spring and autumn growth and highly digestible.

Clanrye – a high ground score variety with good spring and autumn growth. Will create a good base in the sward.

Acorn TWO CUT SILAGE
Intensive Silage Mix (35% Tetraploid)

2.0 kg Seagoe
2.0 kg Dunluce
3.0 kg Clanrye
4.5 kg AberMagic
11.5 kgs

Two Cut Silage

Intensive Silage Mix

KEY FEATURES:

- An ultra reliable performance mixture formulated to deliver longevity and consistent quality
- A high yielding, high quality silage mix suited to a 1st cut in late May or early June
- Produces rapid regrowth after cutting with a highly digestible leafy aftermath.

Contains varieties:

Seagoe (T) - excellent total and silage DM yields with exceptional digestibility values.

Dunluce (T) – excellent seasonal and total yield with exceptional quality. Superb silage yields. A dual purpose variety suited to both intensive grazing and silage cutting.

Clanrye - a high ground score variety with good spring and autumn growth rates. Will create a good base in the sward.

AberMagic - highest ranked diploid variety on the Teagasc PPI. Excellent total, seasonal and silage DM yields. Exceptional quality variety.

Heavy Land Wet Land/Reclamation Mix

Acorn HEAVY LAND
Wet Land/Reclamation Mix (18% Tetraploid)

2.0 kg Navan
4.5 kg Clanrye
4.5 kg Drumbo
0.5 kg White Cloverblend
11.5 kgs

KEY FEATURES:

- Designed for heavy soils
- Specially selected varieties for high ground score to reduce poaching risk
- A high quality mixture to promote good intakes in poorer ground conditions.

Contains varieties:

Navan (T) - a high quality variety with high yields, quality and ground score values.

Clanrye - a high ground score variety with good spring and autumn growth rates. Will create a good base in the sward.

Drumbo - high ground score with good seasonal yields and high digestibility values.
