Roll End Warning

LONGEST NET IN THE IRISH MARKET

Film&Film Wrapping

The Film&Film (F&F) Wrapping System is a revolutionary dual film technology that delivers superior quality silage through greater bale density and an enhanced oxygen barrier.

- Increased oxygen barrier around barrel
- Better shaped, better protected bales
- Peels cleanly from the bale
- No need to separate films for recycling

BALETTITE

VISQUEEN CLINGSEAL

- Reduces air pockets to enhance effectiveness of conventional sheeting
- Reduces top and shoulder losses in the clamp
- Facilitates faster, more efficient fermentation

Acorn Green Edge (Net Wrap)

Acorn 4,200m Net, manufactured by Tama specifically for tough Irish conditions. Extra strong, long and providing excellent bale coverage every time. Proven in the field giving increased efficiency and ultimately delivering great value for money compared to cheaper alternatives.

Black Green Silage Sheets are produced with the best virgin polymers and are gauge guaranteed, which gives superior mechanical properties and strong resistance to impact and tearing for the entire season. Sizes available: 36ft x 75ft, 60ft x 80ft, 60ft x 120ft.

Water Troughs / Drainage

See McDonnell's Biggest Range

Advantages of Precast Concrete Water Troughs

Finished to an extremely high standard with rounded internal corners for extra strength.

Troughs are reinforced with both steel and fibre. Troughs have large drainage bungs (3"). This facilitates fast and efficient emptying and cleaning.

3/4 inch full flow valves deliver over 45 gallons per min. @40psi. and 66 gallons per min @70psi. Larger troughs can come with lifting points for easier installation.
